

## BYD Battery-Box Premium “Be Connect Plus” V1.1 and “Be Connect V1.5.2” Released

Dear Valued Customers,

### Be Connect Plus

Thanks to the hard work from the engineering team. We are happy to inform you that Be Connect Plus (V1.1) was released. Be Connect Plus (BCP) is a PC app, with it, you can configure the battery system, read the battery information, update the firmware, diagnose the battery system and read the historical data.

App file is available at our website ([www.bydbatterybox.com/downloads](http://www.bydbatterybox.com/downloads)) > General Product Files > Be Connect Plus). The Brief Use Guide is also included in the compressed folder.

### New Version Be Connect

The new version (V.1.5.2) makes it possible for customers to read some basic battery information, such as SOC, battery voltage, etc. Also some prompts have been modified, which makes it easier for customers to understand.

Every improvement is based on the voice from you, please be aware of upgrading your app and feel free to share us your comments.
